

## A Publication from the APT Legacy Project

### Special Publications by the Foundation for Preservation Technology and the Association for Preservation Technology International

Between 1975 and 1995, the Foundation for Preservation Technology (FPT) issued a number of publications aided by grants received for original research and printing. Over its 20 years, FPT was instrumental in expanding one of APT's original objectives "to promote the research, collection and publication of technical information in all aspects of historic preservation." Using funds set up by FPT, APT continues to publish technical information beneficial to heritage conservation.

Publication Date	Title and Author
1978	<i>Conservation and Architectural Restoration: Supply Sources and Brief Bibliographies</i> by Richard O. Byrne
1979	<i>W.E.R.-System Manual: Structural Rehabilitation of Deteriorated Timber</i> by Paul Stumes. Edited by Martin E. Weaver and Susan Hum-Hartley; illustrations by Desiré Vanryckeghem
